Mood Board

— WARM BOHEMIAN MODERN —

Earthy, natural, and cozy textures with warm wood, terracotta, greens and inviting accents

Feel relaxed

About Our Theme

The **Warm Bohemian Modern** concept blends natural materials with contemporary comfort to create a relaxed and inviting living environment. This design approach focuses on earthy tones, organic textures, and handcrafted elements that bring warmth and personality into the space.

The color palette is inspired by nature, featuring warm wood tones, terracotta, olive greens, and mustard accents balanced with soft neutral shades. These colors create a cozy atmosphere while maintaining a modern aesthetic.

Natural materials such as wood, stone, woven textiles, and ceramics are layered throughout the space to add depth and texture. Decorative elements like patterned rugs, handcrafted pottery, indoor plants, and soft fabrics enhance the bohemian character while maintaining a clean and harmonious design.

The overall mood is calm, comfortable, and grounded, reflecting a lifestyle that values warmth, simplicity, and connection with natural elements. This theme creates a welcoming space that balances modern functionality with the relaxed charm of bohemian interiors.

FLOOR PLAN

The ground floor plan demonstrates the spatial organization and interior zoning of the residence, designed to create a balance between social, private, and functional spaces. The layout ensures smooth circulation while maintaining visual and functional connectivity between different areas.

The living room is placed at the entrance, creating a welcoming social space for guests and family gatherings. It connects directly to the dining area, allowing an open and comfortable flow for daily activities and shared experiences.

The guest room is positioned in a quieter corner of the house to provide privacy while maintaining easy access to the bathroom. The office room is designed as a separate workspace, ensuring a focused environment without disturbing the main living areas.

The central staircase acts as a key circulation element, efficiently connecting the different levels of the home. Service spaces such as the store room and washroom are strategically placed for convenience while keeping the primary living areas uncluttered.

Overall, the interior layout focuses on functional planning, comfortable living spaces, and efficient movement throughout the home, supporting both daily living and social interaction.

KITCHEN DINING

This kitchen–dining area is designed to create a warm and inviting space that encourages interaction and everyday comfort. The open connection between the kitchen and dining area allows smooth circulation and enhances the sense of openness within the interior.

The dining area features a wooden dining table paired with textured terracotta-toned chairs, adding warmth and visual contrast to the space. The wood flooring enhances the natural and cozy atmosphere while complementing the overall earthy color palette.

A wooden ceiling panel with recessed lighting highlights the dining zone and creates a focal point above the table. The warm lighting enhances the ambience and provides a comfortable environment for dining and social gatherings.

The wall behind the dining table is accentuated with a circular textured wall art piece, which adds visual interest and decorative character to the space. The adjacent open kitchen layout ensures functionality and accessibility while maintaining a cohesive design flow.

Overall, the design focuses on warm materials, soft lighting, and a balanced layout, creating a welcoming and functional kitchen–dining environment.

LIVING ROOM

The living room is designed as a warm and inviting social space that reflects the Bohemian modern theme of the interior. Natural materials, earthy tones, and textured elements are used to create a relaxed and comfortable environment for everyday living.

The seating arrangement includes two sofas positioned around a central wooden coffee table, creating a balanced and interactive layout for conversation and social gatherings. A patterned rug anchors the seating area and adds visual warmth to the wooden flooring.

The space is enhanced with a textured accent wall and patterned wallpaper, adding depth and character to the interior. Large windows allow natural light to enter the room while curtains soften the space and add a cozy atmosphere.

The false ceiling with wooden beams and recessed lighting acts as a focal point, highlighting the seating area and creating a warm ambient glow. Indoor plants and decorative elements bring a natural touch that complements the earthy color palette.

Overall, the design focuses on comfort, warmth, and visual balance, creating a relaxing living space that blends natural textures with contemporary interior elements.

GUEST BED ROOM

The guest bedroom is designed as a warm and comfortable space that reflects the bohemian modern theme of the house. The design focuses on creating a cozy and relaxing atmosphere for guests through the use of natural materials, soft lighting, and warm earthy tones.

The room features a wooden bed with textured knitted bedding, adding warmth and softness to the space. The wooden flooring complements the furniture and enhances the natural aesthetic of the interior.

Decorative elements such as wall art, woven textiles, and soft fabrics add character and visual interest to the room. Warm string lighting is used to create a calming ambience, making the space feel inviting and intimate.

Natural light enters through the window, while the overall layout keeps the room simple and functional. The design balances comfort, warmth, and decorative details, ensuring a pleasant and relaxing environment for guests.

OFFICE ROOM

The guest bedroom is designed as a warm and comfortable space that reflects the bohemian modern theme of the house. The design focuses on creating a cozy and relaxing atmosphere for guests through the use of natural materials, soft lighting, and warm earthy tones.

The room features a wooden bed with textured knitted bedding, adding warmth and softness to the space. The wooden flooring complements the furniture and enhances the natural aesthetic of the interior.
